**MS 1376 (Oversize)  
Architectural Drawing Collection  
1902-1987 (bulk 1930-1960)****DESCRIPTION**

Architectural plans for various buildings and structures located in Tucson, Arizona and the surrounding region, most dated between 1930 and 1960. Highlights include drawings of projects at Tumacacori National Monument (1917), San Xavier Mission (1974), and various Tucson schools including Amphitheater High School, Roskruge School, Sam Hughes School and Elysian Grove School. Many drawings are present for University of Arizona buildings from 1923 – 1960. Commercial buildings represented include the Temple of Music and Art, Plaza Theater, F. W. Woolworth Co., Jacome's Department Store, Masonic Temple, Pioneer Hotel, Old Pueblo Club, J.C. Penny Co., "Roy Place Building," Tucson service stations, Tucson City Hall buildings, and extensive drawings associated with construction of El Con Shopping Center (1961). Also present are several 1930s National Parks Service Master Plans and Historic American Building Surveys including drawings for the Bird Cage Theater (1939), Colossal Cave County park (1937), Tucson Mountain Park (1937), University Indian Ruin (1937), and Tubac Museum (1963).

Architects and firms represented include Dietrich and Goetz; Trost and Trost; Trost and Rust; Henry C. Trost; Henry O. Jaastad; Anne Rockfellow; Robert H. Orr; Lyman & Place; Roy Place; Place and Place; Merritt H. Starkweather; James A. Wetmore; Cecil H. Moore; Friedman and Jobusch; Hawes; Josias Joesler; H. H. Green; Terry Atkinson; Robert Reid; Anne J. Rysdale; Emerson C. Scholer;

**ACQUISITION**

Compiled from various donations.

**ACCESS**

There are no restrictions on access to this collection. Requests to photocopy drawings need to be addressed to a staff member since many items are of a fragile nature.

**COPYRIGHT**

Requests for permission to publish material from this collection should be addressed to the Arizona Historical Society, Tucson, Archives Department.

**PROCESSING**

The collection was processed by Demion Clinco in Spring 2009.

## Folder Listing Master

### Folder 1 – Tucson, Arizona, Religious Buildings (Southern Arizona)

General Plan of Mission Gvevavi - Restored , May 1917

Mission Founded by between 1690-92

1 drawing

Compiled by: Byron Cummings, Archaeologist; Robert H. Forbes, Agriculturist;

L.A. Waterbury, Engineer; H. O. Jaastad, Architect; Prentice Duell, Architect

Vail School District  
Architect: Reid and Hazard; Tucson, Arizona  
Plot Plan and Floor Plan

Roskruge School, Additions and Alterations; Tucson, Arizona, 1931

501 East 6th Street; Tucson, Arizona  
1908 David Holmes; addition 1919 by Henry Jaastad; addition 1931 by Roy Place

Architect: Roy Place; Tucson, Arizona 1931

Built as the first high school for Tucson, this two-story structure was originally Neoclassical in style with exterior walls of exposed brick. In two subsequent additions, the building grew to its current size. The present stylistic expression dates to 1931 when the building was covered with stucco and the modest buff colored portal was added. (Guide to Tucson Architecture)

Sam Hughes School, 1930 Addition; Tucson, Arizona, 1930

Block Five Alta Vista Addition

700 North Wilson Avenue

1927 Roy Place; A Jacobson contractor

Architect: Roy Place; Tucson, Arizona

The form and stylistic vocabulary of this Spanish Colonial revival building evoke more an image of a church than a school. The prominence of the two story administration building is clearly expressed with the grand scale created by a tower and centered entry doors, both incorporating semicircular arches. The class-room buildings have the feel of California Mission architecture with low-pitch, clay-tile roofs. (Guide to Tucson Architecture)

Elysian Grove School; Tucson, Arizona, 1930

440 South Main Avenue

Architect: Merritt H. Starkweather, FAIA

Contractor: R. H. Martin

Twelve original classrooms were built in the Mission Revival style on the exterior, with Craftsman woodwork inside including the wide doors of dark stained wood. There were several later additions and renovations, including filling in the pool that the school board had inherited when then purchased the Elysian Grove property from Emmanuel Drachman.

### **Folder 10 – Tucson, Arizona, University of Arizona Buildings**

Steward Observatory, University of Arizona, Tucson, Arizona, 1921-1923  
 University of Arizona Campus  
 Architect: Lyman & Roy Place

Built on the highest point of the University's flat mesa to accommodate the 36-inch reflecting telescope, the white terra cotta tile exterior reflects heat and keeps the instruments inside cool. A Classical Revival expression can be seen in the use of implied pilasters and entablature on this small octagonal building. The dome itself was designed by Gedfrey Sykes.

### **Folder 11 – Tucson, Arizona, Commercial Buildings, Theaters and Grand Stands**

Temple of Music & Art; Tucson Arizona, September 1, 1926

330 South Scott Avenue, 1927

Architect: Arthur W. Hawes – 457 So. Western Ave; Los Angeles, California

Comm No. 115

The Open side of the U-shaped plan of this Spanish Colonial Revival structure faces the street, creating an inviting courtyard paved in Mexican tile and featuring a fountain. Because Hawes assisted in the design of the Pasadena Community Playhouse in California, it is not surprising that the Temple is so similar.

**Folder 16 – Tucson, Arizona, Commercial Buildings, Downtown, Masonic Temple  
(Scottish Rite Cathedral)**

**FRAGILE**

Masonic Temple (Scottish Rite Cathedral); Tucson, Arizona, April 14, 1915  
160 S. Scott Avenue  
Architect: Trost & Trost; El Paso, Texas  
Comm 2321

A surprising variety of Neoclassical stylistic influences are combined in this Masonic temple. The symmetrical exterior façade of brick and terra cotta meshes the large scale of the Roman Revival with a restrained Greek Revival ornament, seen in the Ionic capitals. Passing through the small entry, the central interior stairway rises to a lobby with Craftsman period elements: dark wooden beams, wall paneling, and decorative light fixtures. Continuing through to the openness of spacious main hall, the surprise comes in realizing that it is decorated in the High Renaissance style complete with pilasters, Corinthian

capitals, and formal raised seating on both sides with a large stage at the far end. Typical of many of the buildings in Trost's short career in Tucson, the resulting combination of seemingly disparate influences is at once odd and pleasing. (A guide to Tucson Architecture)

### **Folder 24 – Tucson, Arizona, Commercial Buildings, Hotel, El Conquistador**

El Conquistador Hotel, Tucson, Arizona, 1925-1928

3601 East Broadway

Architect: Henry Jaastad and Annie Rockfellow

The victim of bad timing, this sprawling and romantic interpretation of the Mission and Spanish Colonial Revival styles could not survive the Great Depression, went bankrupt in 1935, and suffered continued financial trouble until the 1960s. The structure of this luxurious tourist hotel was 140 feet long, the tower was 45 feet high, and there were forty guests rooms with separate baths and spectacular views of the Santa Catalina and Santa Rita mountain ranges as there wasn't anything to obstruct either view in 1928. The arcaded structure was built of brick, with stucco and terra cotta ornament and a red tile roof; the construction cost was approximately \$500,000. One of the most unique features on the exterior was the incorporation of bas-relief images of saguaro, ocotillo, and barrel cacti in the entablature, with prickly pear capitals on Baroque twisted columns. The hotel included a lobby, a curio shop, and a gracious dining room that could seat 300 guests. The dining room had a large fireplace, a balcony for an orchestra, columns, "Spanish-style" chandeliers, and ceiling beams that were colorfully decorated. Officially the project of the office of Henry Jaastad, Annie Rockfellow was the design architect, and the drawings are similar to others in her hand. She considered this her finest design, calling it her "prize" or her "ultimate design." Two fragments of the building survive at separate locations: The porte cochere is at the entrance to the Sin Vacas gated community, E. Ina Road just west of Campbell Avenue; the copper dome is located on the Casa Blanca Shopping Center on the northeast corner of Oracle and Rudasill Roads (from Nequette, Anne M. and Jeffery, R. Brooks, *A Guide to Tucson Architecture*, University of Arizona Press 2002.)

## **Folder 26 – Tucson, Arizona, Governmental Buildings, United States Post Office and Court House**

United States Post Office and Court House, Tucson, Arizona, 1929

55 drawings

55 East Broadway Boulevard

Architect: James A. Wetmore (Department of the U.S. Treasury)

Drawn by Hart Wallace

Originally built as a ground-floor post office with courtrooms on the second floor, the retained Neoclassical style here is apparent in the corner quoins and decorative pilasters of terra cotta that support a mottled glaze made to look like stone, but with accents in color. The building is made from various shades of buff-colored brick and uses Roman and Greek ornament with heavy bronze doors and decorative iron lamps at the entry. Even the underside of the projecting eaves has a architectural pattern with accent color. (from Nequette, Anne M. and Jeffery, R. Brooks, A Guide to Tucson Architecture, University of Arizona Press 2002.)

## Folder 27 – Tucson, Arizona, Governmental Buildings, City Hall

First Tucson City Hall, (demolished), 1916

Architect: Sidney F. Mashbir and M.H. Starkweather  
 Basement Plan  
 First Floor Plan

Second Tucson City Hall, 1939; demolished 1972

Typical of American governmental buildings of that period, this two story building was designed in the Classical Revival style with a raised basement, fluted columns, Ionic capitals, a portico with ornamented pediment and balustrade at the parapet.

### **Folder 30 – Tucson, Arizona, Residential Buildings**

#### **FRAGILE**

Residence, Additions, Garage, Store Building of Frank H. Hereford, 1902

340 North Main Ave; Tucson, Arizona

Also known as the “Francis Hereford House”  
Architects: Trost and Rust; Tucson, Arizona  
D.H. & J.H. Holmes Architect, Tucson, Arizona  
“D.H. An...(lost)”

This two story stuccoed brick house appears to be a large cube with the projecting flat roofs that are often associated with the Prairie style and Frank Lloyd Wright’s Unity Temple. In addition, it is reminiscent of the work of Irving Gill, the pioneering California architect who explored a modern approach to the Spanish Colonial Revival styles that resulted in a simplified version, including very smooth white walls, round arcades and vertical rectangular window openings. The west side is a full three stories tall, adapting to the steep slope. The original plaster ornament on the fascia is still apparent, though somewhat softened by time. (Nequette p.58)

Sheets are not numbered but are bound.

- Sheet no. 1 Shelving
